- (d) The average of the values of the different analysis results of 24 hourly composite or grab samples of the effluent, taken during the relevant month and as prescribed in terms of the permit referred to in subparagraph (b) above will be used to determine the treatment charge payable.

Should the user not accept the values obtained from the said analysis intended in this sub-paragraph the user may request further tests at the cost of such user to be done by a laboratory acceptable to the Council and the user.

- (h) If a meter metering the quantity of water consumed on the premises is proven to be defective, the appropriate adjustments shall be made to the quantity of industrial effluent discharged when calculated as prescribed in subparagraph (g) and the defective meter shall be repaired or replaced as soon as possible.
- (i) For the purpose of calculation of the quantity of industrial effluent discharged from each point of discharge of industrial effluent as aforesaid, the total quantity of water consumed on the premises shall be allocated among the several points of discharge as accurately as is reasonably practical after consultation between the Council and the users of the relevant premises.
- (j) The owner or occupier of premises where an industrial effluent meter is installed, shall ensure that the meter is calibrated annually.
