Housing units in a group development will only be allowed a 20 Amp circuit breaker, if a larger capacity circuit breaker is required, a recalculation of the extra capacity above the 20 Amp capacities needed, will be done and the developer will have to pay the extra amount, before the connection will be made, at a rate of per 5 Amp	R 4 176.21	R	4 426.79	6.00%
	The above also apply after completion of a project and the consumer within the development request an increase in capacity.				
	Note: Over and above the bulk contribution the developer must pay the connection fees as applicable for the particular application				
	Housing units must incorporate alternative energy technology to be able keep the load within the 20 Amp limitations.				
	$AMD = ZMD \times N \times C$				
	Where AMD = Authorised maximum demand				
	ZMD = Zoned maximum demand (13.8 kVa)				
	N = Number of housing units C = Housing factor according to the table below				
6.1.1	Zoned maximum demand (ZMD) per erf and is determined by the Town-planning Scheme and is as follows:				
(i)	Residential 1, or Special and Undetermined, for a specific use which, in the opinion of the Executive Director: Engineering Services, is in accordance with Residential, on which only one or, at the most two, dwelling-units per erf, may be erected. 13.8 kVA per potential dwelling				
(ii)	Multiple Residential, Residential 2 or Special or Undetermined, for a specific use which in the opinion of the Executive Director: Engineering Services, is in accordance with Multiple Residential. 13.8 kVA per potential dwelling

	For blocks or groups of housing units: The number of potential dwelling units is calculated in accordance with the permissible floor space ratio as determined in the Town planning Scheme and where each dwelling-unit has an area of 100 m², or the number of dwelling-units as determined by the Scheme.			
	1 unit = 1,00			
	2 units = 0,72			
	3 units = 0,62			
	4 units = 0,57			
	5 units = 0,53			
	6 to 10 units = 0,50

	21 to 30 units = 0,47			
	31 to 40 units = 0,48			
	41 to 50 units = 0,45			
	More than 50 units = 0,40			
	The final rating and the provision of a single connection point will be at the discretion of the Executive Director: Engineering Services. Where there are twelve dwelling-units or more (including the service connection) at a density of twenty dwelling-units or more per hectare, and where the Municipality does not take over the internal electrical network, the premises will be provided with a single connection point. These dwelling-units will be rated at the next, lower kVA rating for the specific area.			
	The final rating and the provision of a single connection point will be at the discretion of the Executive Director: Engineering Services.			
(iii)	Businesses or Special and Undetermined, for a specific use which, in the opinion of the Executive Director: Engineering Services, is in accordance with business. 7 kVA per 100 m² of potential floor area			
(iv)	Industrial and Light Industrial or Special and Undetermined, for a specific use which is in the opinion of the Executive Director: Engineering Services, is in accordance with Industrial and Light Industrial. 2.5 kVA per 100 m² of potential floor area.			
(v)	Agricultural or Special and Undetermined, for a specific use which, in the opinion of the Executive Director: Engineering Services, is in accordance with Agricultural. 13.8 kVA per erf			
(vi)	Any other use not referred to in (i), (ii), (iii), (iv) or (v) of the above : 0 kVA per erf			
6.2	QUOTA CHARGES			
6.2.1	General			
	The scales of the tariff for the supply of electricity as detailed in the Schedule. Supply of Electricity Part 1 are based on the costs associated with the provision of the supply to the various groups of consumers in the normal electrically developed areas within the Midvaal electricity supplied area. Where the supply needs to be provided to new premises or groups of premises or where an existing customer applies for an increased supply, the cost of extending the distribution and reticulation networks within the Municipality that is not recovered from the tariff for the supply of electricity as set out in the Schedule : Supply of Electricity Part I must be paid by the developer/consumer as an external engineering service.			
	The developer of a township must provide for and install the full quota allocated per erf for which an application has been made in respect of the distribution and reticulation systems. If the distribution and reticulation systems are not fully installed, the developer must compensate the Municipality for the difference between the allocated quota and the set quota at the prevailing quota charge. This is deemed to be contributions for external engineering services. The existing quota of the property prior to the latest application for development is used as a credit in the calculation. This quota is calculated in the same way as mentioned above			
6.2.2	Determining charges			
	The quota charge is finally determined by the actual level at which the development connects to the supply system. The charge is calculated as follows			
	$Q = [(Dn - De) C]$			
	Q = quota charge payable in rand			
	Dn = Sum of new development property ADMDs in kVA			
	De = Sum of existing development property ADMDs in kVA			
	C = Contribution per kVA at connection level as indicated in 6.2.3 below			
6.2.3	Contributions			
	The quota charge, which does not include the connection cost, must be such as to cover the possible existing or future capital liabilities incurred or to be incurred by the Municipality in supplying the distribution and/or reticulation network to increase the quota to the premises or group of premises. The contributions per kVA at the different connection levels are as follows: (if in a particular development the contribution will not cover the infrastructure to be installed the Director: Electrical will determine the cost, which will be payable by the developer)

	In instances where township owners/developers have already paid a quota charge during township establishment, or where a quota charge was paid at the time of scheme amendments, subdivision or consent use, a quota charge is payable for every kVA by which the notified maximum demand indicated by the end consumer or his or her authorised representative exceeds the allocated quota which has already been paid for.					
	Once payment, calculated at the applicable connection level, has been received, this notified maximum demand will then become the new AMD of the erf.

8.		WATER RESTRICTION TARIFFS			
		The Municipality may be required to restrict (other than the debt management restrictions) the demand and usage of water by its consumers in drought, water shortage, and disaster and water crisis situations.			
		The restriction may take the form of voluntary restriction by consumers where upon they reduce the consumption or usage on their own, pressure reduction, installation of water management devices, rationing and/or water cuts at given times. In all cases the water restriction tariffs shall apply.			
		Should water restriction be declared by Council or its delegated authority, the percentage increase shall apply and be payable as follows in respect of uses listed in the following items.			
		The increase shall be with effect from the date as pronounced by the Council or the delegated authority.			
		Level 2 Water Restriction Tariffs			
		In the event that Midvaal Local Municipality imposes a level 2 Water Restriction, The Water Restriction Tariff below will apply.			
		Level of consumption (all categories of residential users)			
		Consumption 0 - 20kl	0%	0%	0.00%
		Consumption 21 - 30kl	10%	10%	0.00%
		Consumption 31 - 45kl	20%	20%	0.00%
		Consumption > 45kl	30%	30%	0.00%
		All other categories of users for any consumption in excess of levels as approved by Council should water restrictions be applied	25%	25%	0.00%
		Level 3 Water Restriction Tariffs			
		In the event that Midvaal Local Municipality imposes a level 3 Water Restriction, The Water Restriction Tariff below will apply.			
		Level of consumption (all categories of residential users)			
		Consumption 0 - 20kl	5%	5%	0.00%
		Consumption 21 - 30kl	15%	15%	0.00%
		Consumption 31 - 45kl	25%	25%	0.00%
		Consumption > 45kl	35%	35%	0.00%
		All other categories of users for any consumption in excess of levels as approved by Council should water restrictions be applied	30%	30%	0.00%

THE FOLLOWING MUST BE NOTED:

1. The Midvaal Local Municipality shall have the right to restrict the water supply to any customer who has unsettled debt with the Municipality.
2. The figures quoted in this Schedule of Tariffs EXCLUDE Value Added Tax.
3. These tariffs shall be read in conjunction with the By-laws for the Supply of Water Services published by the Midvaal Local Municipality.

5.1		Industrial Effluent Discharge Permit			6.00%
5.2		In respect of industrial effluent, the tariff			
		specified in items 5.3.2 shall be payable by the user.			
5.3		Industrial Effluent Treatment Charge			
5.3.1		Calculation of Industrial Effluent Treatment Charge			
		The following provisions apply with regard to and for purposes of			
		calculating the treatment charge provided for in item 5.3.2			
(a)		The owner or occupier of any premises from which industrial effluent is discharged shall, in addition to any other charges provided for in these tariffs or in any other law, pay to the Council a charge calculated in accordance with the provisions of these tariffs in respect of each month during which such discharge takes place.			
(b)		Each user discharging effluent into the Council's sewage disposal system shall test such industrial effluent, on a regular schedule as provided for in the permit to discharge industrial effluent, and report the results to the Council.

(c)		The Council shall in its entire discretion conduct analysis of			
		industrial effluence at random. The values obtained by the			
		Council shall be taken as correct and used to calculate the			
		treatment charge. Whenever a sample is taken by the Council,			
		one half thereof shall be made available to the user, if required			
		at the time when the sample was taken.			
(d)		The average of the values of the different analysis results of 24			
		hourly composite or grab samples of the effluent, taken during			
		the relevant month and as prescribed in terms of the permit			
		referred to in sub paragraph (b) above will be used to determine			
		the treatment charge payable.			
		Should the user not accept the values obtained from the said			
		analysis intended in this sub paragraph the user may request			
		further tests at the cost of such user to be done by a laboratory			
		acceptable to the Council and the user.			
(e)		Should the user fail to submit to the Council timeously the			
		results required in terms of sub paragraph (b) above, the results			
		obtained by the Council from the last test results submitted in			
		terms of the provisions of sub paragraph (b) shall remain applicable.			
(f)		In the absence of any direct measurement, the quantity of			
		industrial effluent discharged during a period shall be			
		determined by the Council taking into consideration the			
		quantity of the water consumed on the premises for domestic			
		purposes, the quantity lost to the atmosphere during the			
		process of manufacture and the quantity present in the final

		product produced on the premises.			
(g)		If a meter metering the quantity of water consumed on the premises is proven to be defective, the appropriate adjustments shall be made to the quantity of industrial effluent discharged when calculated as prescribed in sub paragraph (f) and the defective meter shall be repaired or replaced as soon as possible.			
(h)		For the purpose of calculation of the quantity of industrial effluent discharged from each point of discharge of industrial effluent as aforesaid, the total quantity of water consumed on the premises shall be allocated amount the several points of discharge as accurately as is reasonably practical after consultation between the Council and the users of the relevant premises.			
(i)		The owner or occupier of premises where an industrial effluent meter is installed, shall ensure that the meter is calibrated annually.			
5.3.2		Treatment charge			
		The owner or occupier of any premises on which any trade or industry is carried out and from which, as a result of such trade and industry or of any process incidental thereto, any effluent (herein after referred to as "industrial effluent") is discharged into the Council's sewage disposal system, shall in addition to any other fee or charges for which such owner or occupier may be liable for in terms of these tariffs, also pay to the Council a treatment charge, being an amount calculated on the industrial effluent discharged, the strengths and the permitted (allowed) concentrations of the industrial effluent discharged during the relevant month and in accordance with the following formula:			
		$Ti = C/12 (Qi/Qt)[a + b(CODi/CODt) + c(Pi/Pt) + d(Ni/Nt) + e(Ssi/SSt)]$			
		Ti = Charges per month for the treatment of industrial effluent.
